

READY TO GO - MAN OVERBOARD RESCUE

SMRT SOS DAN BUOY

The SMRT SOS Dan Buoy is patented, man overboard equipment, ready for instant deployment.

The newly patented sMRT SOS Dan Buoy is a compact, self-contained device, specifically designed to make rescue and recovery of a Man Overboard incident a simple and reliable operation. There is no need to set or activate the sMRT SOS Dan Buoy – it's ready to go, just throw it into the water towards the person over board.

We take the **SEARCH** out of search and rescue

sMRT SOS DAN BUOY

Within seconds of immersion it inflates, stands 2.0 meters above the water line and the internationally approved **sMRT V100 Locator Beacon** automatically transmits GPS coordinates to your chart plotter via AIS. Additionally an alarm will immediately be sent to your VHF DSC radio so your captain will be alerted to the MOB incident.

The **sMRT SOS Dan Buoy** has a highly visible strobe light for night

rescue ensuring that any MOB victim is assured of the best chance of survival irrespective of the conditions. Webbing loops allow the person to put their arms around the buoy to help support them when fatigued. This gives extra support and security while awaiting rescue and the unit is highly visible from 1,700 meters and can be tracked by AIS up to 150 miles away.

The sMRT SOS Dan Buoy is provided in a bespoke, all-weather case which can be mounted anywhere on your vessel.

Marine Rescue Technologies are proud to release the joint development of the **sMRT SOS Dan Buoy** with Australian manufacturer SOS Marine, which integrates two best of breed life saving devices ensuring that all MOB incidents conclude with a safe and speedy recovery.
